**TCOURB'**<sup>®</sup>  
by **plastil**

# The smart way to separate your materials

## A simple principle

This T or L shaped profile enables you to **separate all types of material** (e.g. grass and gravel). Used effectively for **straight lines, curves or waves**, TCOURB' allows you to quickly **create limitless borders**.

Light and easy to cut, **Tcourb' is extremely simple to install**. It requires minimal effort and is quick to install for durable and aesthetic results.

Thanks to its shape, Tcourb' acts as a **stable barrier between materials and does not degrade over time**.

## Its many applications

### Landscaping

- Mark out green spaces
- Mark out pathways

### Masonry Trade

- Creating division joints for concrete flooring
- Use as a ruler
- Mark out zones for decorative flooring

### Building, Public Works

- Laying concrete slabs
- Split joins
- Concrete line marker

# The Benefits of Tcourb'

## Simple and Effective

Made of PVC or aluminium, **Tcourb' does not deteriorate over time** (it's resistant to cold, sunshine and moisture) **plus it is repositionable**.

Once it has been set in place, Tcourb' retains its rigidity and durability. It is perfectly resistant to passing mowers and edge trimmers.

It is a discreet product, almost invisible once fitted. It is lightweight, which makes it easy to transport, handle and store.

## Environmentally friendly

Designed and **manufactured in France** (patent registered in the UK), Tcourb' is made from **recycled PVC or aluminium**. It is **100% recyclable**.

Using Tcourb' to separate areas considerably reduces the spread of root systems (e.g. grass), **thus reducing maintenance**.

## Innovative

With one simple move, **transform the PVC T profile to an L profile** thanks to the divisible base of the new Tcourb'.

In order to optimise the best connection, Tcourb' profiles are equipped with connection systems that are extremely easy and efficient to use (U and H fittings).

Tcourb' allows complete freedom of form

## 4 Steps to Creating a Border

**1** Prepare the base outline

**2** Cut the **Tcourb'** base

**3** Position and secure the **Tcourb'**

**4** Lay the material

### PVC PROFILES

Length: 2,00 m	Fittings		 U Connection
5 heights	U	H	
30 mm  			 H Connection
40 mm  			
50 mm  			
70 mm  			
120 mm  			

■ GC (Light Grey)  
■ GA (Anthracite Grey)

Box quantity:  
40 lm box  
(20 lengths x 2.00m)

### ALUMINIUM PROFILES

Length: 2,00 m	Fittings
Tcourb' 40 mm	U
Tcourb' 50 mm	U
<b>Tcourb' 100 mm</b>	U
Lcourb' 50 mm	U

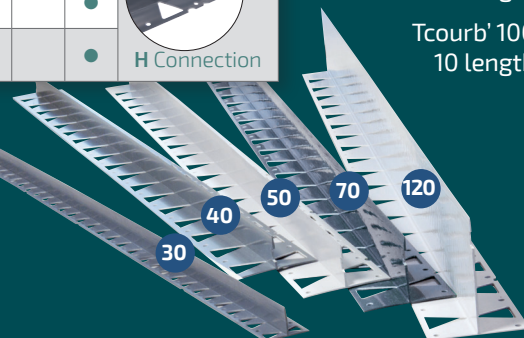

Box quantity: 40 lm box  
20 lengths x 2.00 m)

Tcourb' 100: 20 lm box  
10 lengths x 2.00 m)

Tcourb' ALU 100
